

QUICK START GUIDE

MY FILTERS

Learn:

1. What Filters Are & Their Functionality

- 2. How to Create a Filter
- 3. How to Copy a Filter
- 4. How to Modify or Delete a Filter

FILTER EXPLANATION

Filters are a set of specific saved search criteria called "properties" that allow users to narrow down what information displays throughout the different tabs of the Labcheck portal. Based on the filter conditions that are applied, data will be displayed accordingly.

Filters are designed to save time when searching for Sample Reports and Equipment or when creating Labels or Management Reports.

Filters are applicable to the SAMPLES, EQUIPMENT, LABELS, REPORTS and DISTRIBUTION tabs.

FILTER PROPERTIES

Filter Properties are the data fields in which you choose to apply your filter. Depending on which tab you are in, the applicable filter properties are applied.

The table below explains which properties are applicable on each tab.

| SAMPLES | EQUIPMENT | LABELS | REPORTS |
|--|--|--|---------------------------------|
| Customer Name Customer Worksite City / State / Zip Unit ID Unit Worksite Unit Make Unit Model Component Type Component Make Component Model Component Reference Number Sample Condition Oil Manufacturer Oil Brand | Customer Worksite Unit ID Unit Manufacturer Unit Model Component | Component Unit ID Customer Worksite Tracking Number Status | Customer Worksite Date Range |
| Oil Grade | 1165 | | |

FILTER OPERATORS

| Equals | Will only display results that <u>match the exact</u> value input for the given property |
|-------------|--|
| Not equals | Will only display results that <u>do not match the</u> <u>exact</u> value input for the given property |
| Starts with | Will only display results that <u>begin</u> with the value input for the given property |
| Contains | Will only display results that <u>contain</u> the value input for the given property |

FILTER VALUES

The Value field should be filled out based on what Property and Operator are selected. For example, if you are searching reports but only want to view reports for engines, you would select 'Component' as the property. In the Operator field, you would choose 'Equals' because you know the exact component you are looking for. Last, in the value field, you would enter 'Engine.' So for this example, it would pull up all engines. Screenshots of this example are included in the next slides.

ACCESSING FILTERS

To access MY FILTERS, click on the **PREFERENCES** tab and select the MY FILTERS tile.
